

## Meeting Minutes:

**Event: MySQL Data Types and SQL Functions Exploration Workshop**

**Date + Time: 02-05-24 & 11:30 am**

**Location: JAIN UNIVERSITY**

Conducted By: Pasam Nutan

Session Title: Exploring MySQL Data Types and SQL Functions

### Objective:

Gain a comprehensive understanding of MySQL data types and delve into the exploration of SQL functionalities through designated research tasks.

### Agenda:

Unveiling MySQL Data Types

Delving into Practical Use Cases

Identifying Key Variations Among Data Types

Researching Specific SQL Functions

### Key Insights & Tasks:

Acquired familiarity with a spectrum of MySQL data types, discerning their characteristics and applications.

Explored practical examples illuminating the usage of diverse data types for effective database management.

Emphasized the distinguishing features between similar data types to optimize database design and operations.

Assigned research tasks to delve deeper into specific SQL functions, enhancing understanding of their functionalities in data manipulation and retrieval processes.
